Summary

Undergraduate Computer Science student with a strong interest in **IoT, Java development, and cybersecurity**. Skilled in programming languages such as **Java, Python** with practical experience in **AI/ML, IoT systems, and software development projects**. Strong problem-solving and teamwork abilities demonstrated through academic and personal projects. Passionate about building secure, efficient, and scalable solutions while continuously learning and exploring new technologies.

Education Qualification

- Pursuing an undergrad in the stream of Computer Science and Engineering at BNMIT College with a 9.59 CGPA and graduating in 2027
- Completed PU education with a focus on science, achieving an 92.76% at Jnana Jyothi PU College in 2022
- Completed SSLC education, achieving 93.76% at Jnana Jyothi High School in 2020

Projects

- **Smart Irrigation System**
Developed an automated irrigation system using Raspberry Pi to monitor soil moisture levels and control water pumps. Integrated real-time weather data to optimize water usage and prevent over-watering.
- **Password Strength Audit**
Developed an website in kali Linux system using to identify the strength of an password whether its a weak or a strong password and also generate a strong password with respect to the entered name.
- **ML based to refine-captcha**
Designed a machine learning model integrated with frontend (JavaScript/React) to capture browser and user interaction parameters, and a backend classifier to detect bots versus humans. The solution replaces CAPTCHA with a passive, privacy-compliant approach that secures UIDAI APIs.

Skills

Technical Skills

- **Programming Languages:** C(Basic), Java
- **Concepts:** Oops
- **Database:** MySQL, MongoDB
- **Web Development:** HTML/CSS
- **Tools and Platforms:** VS Code, GitHub, Linux, RaspberryPi OS

Soft Skills

- Teamwork
- Communication
- Adaptability
- Creativity

Internships

- Completed an **Penetration Testing: Concepts, Tools and Techniques** internship at Ganaka Praudayogikee (2/06/2025 – 27/06/2025), learned penetration testing methodologies and applied industry-standard tools to identify and analyze system vulnerabilities.
- **Virtual Internship – Web Development | SkillCraft Technology (Aug 1 – Sep 1, 2025)**
Completed a one-month virtual internship in web development at Skill Craft Technology. I learned to build and design websites using HTML, CSS, and JavaScript, and gained practical experience in creating responsive and easy-to-use web pages.

Certifications

Postman Student Expert | Introduction to MongoDB
